PETITION FOR AFFORDABLE, RENEWABLE ENERGY AND A NEW CLIMATE PLAN TO THE LEGISLATIVE ASSEMBLY OF ONTARIO

WHEREAS the Province of Ontario is pursuing an electricity plan subsidized by billions of public dollars that is increasing reliance on fossil gas and nuclear power, that ignores lower cost, renewable energy alternatives, and is resulting in rising electricity rates, massive public health harms, and more waste and pollution.

Therefore, WE THE UNDERSIGNED, residents of Ontario, petition the Legislative Assembly of Ontario to immediately:

Develop a new climate plan that triples wind and solar power, scales battery storage across the province, allows for the development of Great Lakes wind power, rapidly phases out reliance on fossil gas, and upholds our obligations to ensure free, prior and informed consent over any projects happening on Indigenous lands.
